MULTI VTM i

Highlights

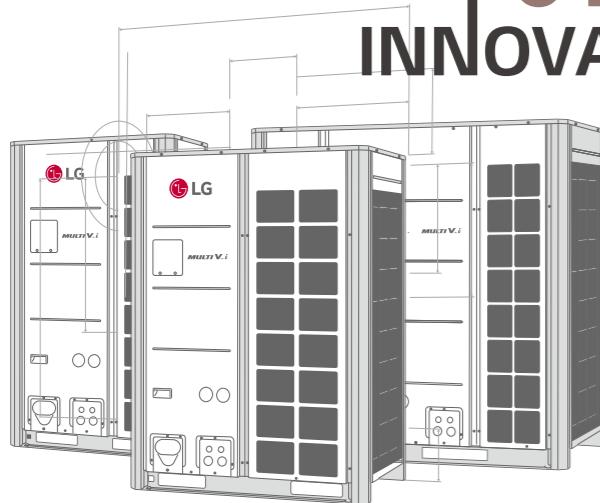

- Air-cooled VRF Heat Pump & Heat Recovery
- 22.4kW ~ 268.8kW (Cooling capacity based)
- 3Ø, 380 ~ 415V, 50Hz
- Top discharge outdoor unit
- Ability to function as Heat Pump or Heat Recovery

How does it work?

01 INNOVATIVE

INNOVATIVE

Innovative Energy efficiency / Performance realization

- Maximum 26HP for a Single Outdoor Unit
- Compact Design with Larger Capacity
- Powerful Performance
- Powerful Cooling Performance
- Powerful Heating Performance
- Newly Designed Compact Fan
- Flexible Outdoor Units Combination
- Corrosion Resistant

02 INTELLIGENT

Recognizes various environments & optimizes itself through its AI Engine

AI EFFICIENCY UP

- AI Smart Care
- AI Energy Waste Alert
- AI Energy Management

AI COMFORT UP

- Noise Adaptive Control
- Noise Target Control
- Weather Information Interlocking Control

AI SMART UP

- AI Smart Diagnosis
- Large Capacity Black Box
- Auto Tuning System

03 INTERACTIVE

Upgrading & evolutionary system according to customer

- LG's Control Solution
- New Innovative Controller
- Smart GUI

Interlocking
System

- A/C (Air Conditioner)
- LG AHU
- Valve / Pump AO (Analog Output)
- Occupancy Sensor / Alarm / Key-Tag DI (Digital Input)
- Fan / Lighting / Switch DO (Digital Output)
- Temperature / Humidity / CO₂ Sensor AI (Analog Input)

Maximum 26HP for a Single Outdoor Unit

LG MULTI V I saves space, time, and installation costs by offering a larger capacity single outdoor unit.

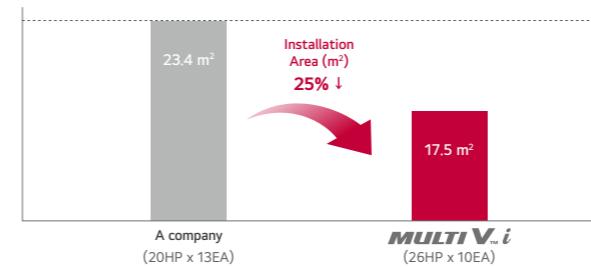

Compact Design with Larger Capacity

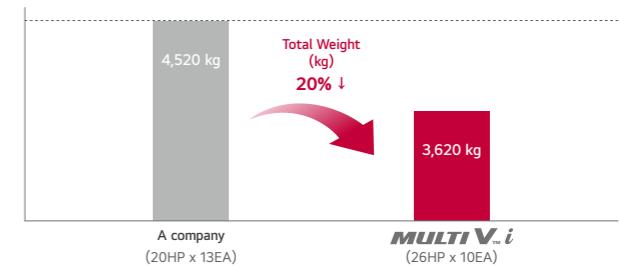

Lighter outdoor units reduce the installation area and architecture structure, increasing the space for roof gardens.

Install 260HP

※ Previous model: ARUM261LTE5, New model: ARUM260LTE6
※ This scene is designed only for easier understanding, because 26HP unit cannot be applicable.

Powerful Performance

MULTI V 5 has already proved itself highly competitive in the European market in terms of efficiency levels, but MULTI V *i* exceeded its predecessor.

[Better than the Best]

※ For certain models in the line-up.

Powerful Heating Performance

More reliable heating operation is provided at down to -30°C and full performance at -10°C. Stable heating performance is guaranteed even in the case of an unexpected outdoor temperature drop.

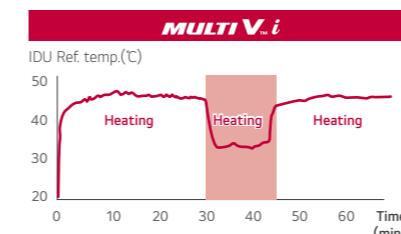

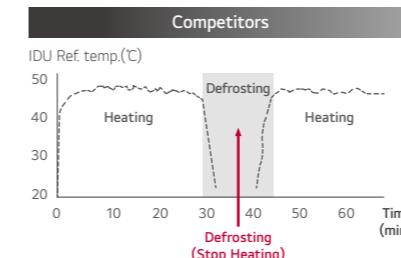

Improved design

Improved design for defrost with an independent HEX system and accumulated freezing prevention design. With a differentiated structure and design, it provides longer heating time and reduced defrost time.

Continuous Heating

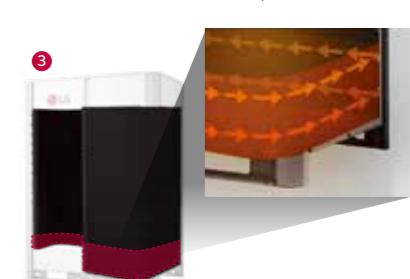

The heating operation duration was extended by independent HEX system for defrosting.

NEW Accumulated Freezing Prevention Design
Preventing the freezing of the lower part of the heat exchanger

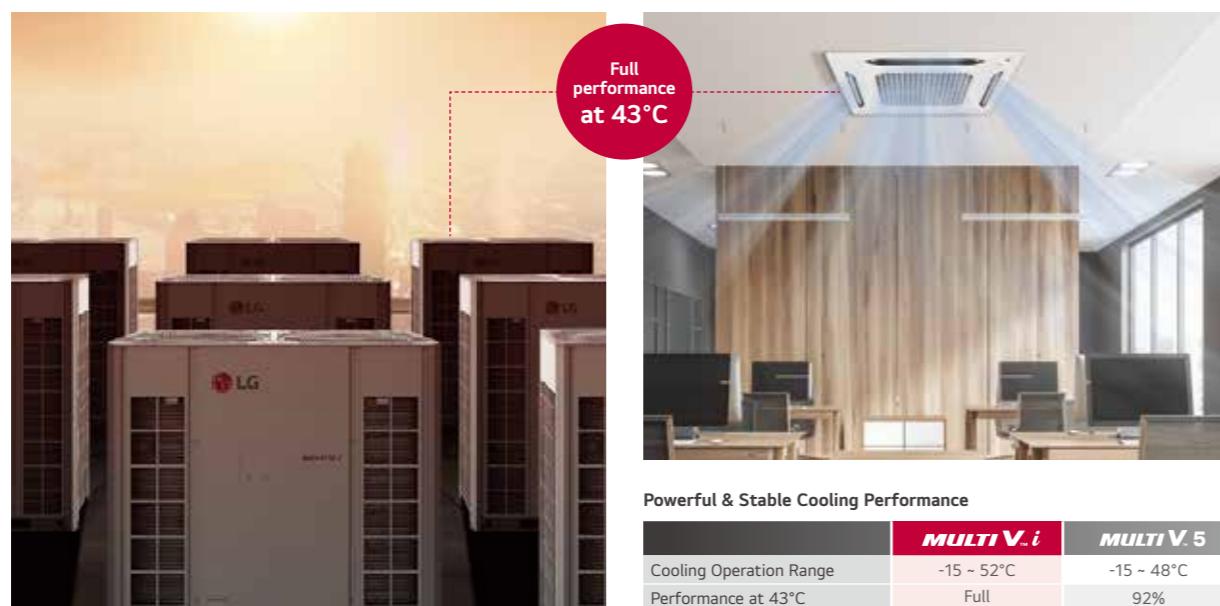

Defrost Time Reduction
65% ↓

Powerful Cooling Performance

Reliable cooling operation up to 52°C, with full performance at 43°C. End users are able to enjoy comfortable indoor environments, even with extreme weather conditions outside.

※ Final specifications may change slightly.

※ The defrost process is simplified for easier understanding.

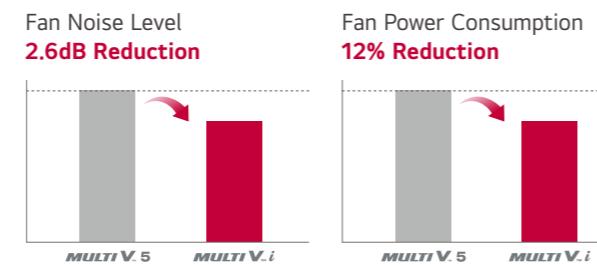

※ HEX: Heat Exchanger

Newly Designed Compact Fan

The design of a new biomimetic fan was inspired by nature. It brings more air volume and less noise with the same air flow rate compared to the conventional system.

* Final specifications may change slightly.

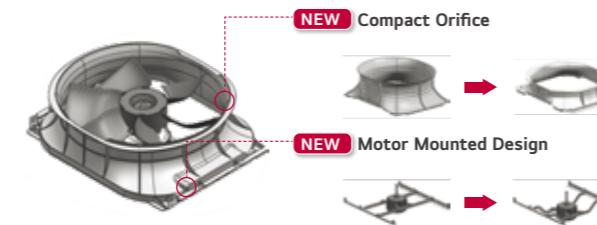

NEW Designed Biomimetic Fan

The new biomimetic fan has 6 blades that can reduce noise level and power consumption.

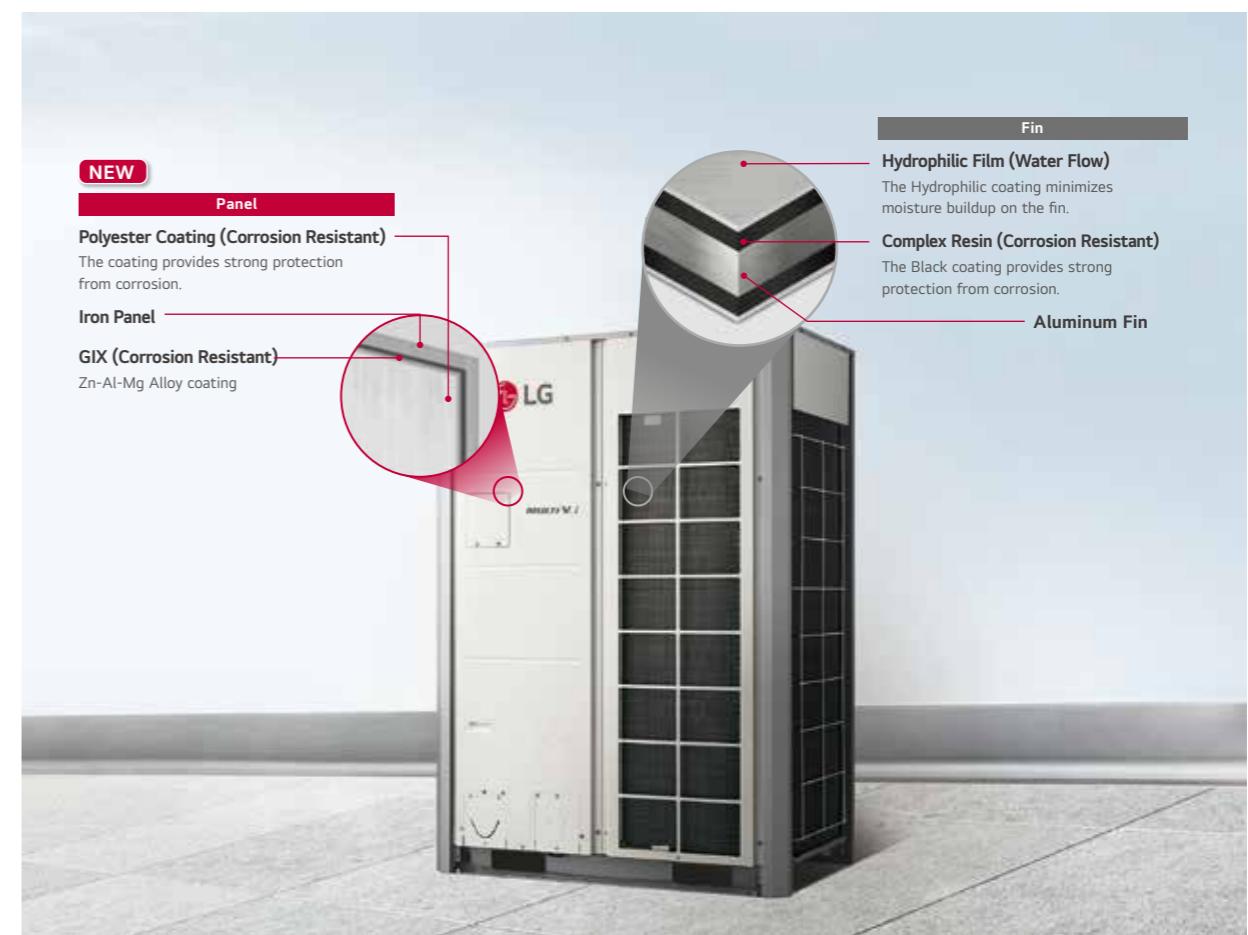

Compact Aero-Design

With an optimal air flow, the noise level and power consumption is reduced.

Corrosion Resistant

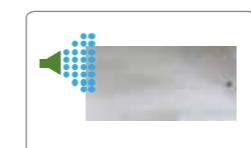

"Corrosion Resistant Black Fin" heat exchanger is designed for improved corrosion resistance. Body panels are also designed for improved corrosion resistance. 2,000 hours for body panels and 10,000 hours for heat exchanger make the product more reliable for customers.

Salt Spray Test (SST)

* Process repeated

0.05% Area of defects compared to initial state.

Salt Spray Test (SST)

* Process repeated

0.05% Area of defects compared to initial state.

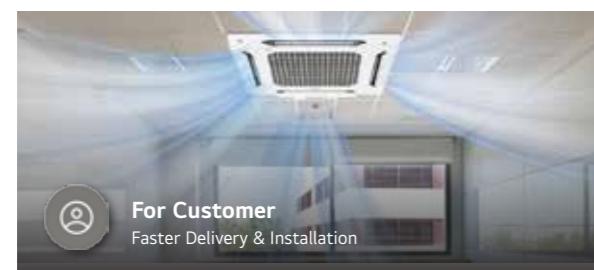

Flexible Outdoor Unit Combination

Flexible combination can contribute to faster delivery and installation. It provides more options for designing according to customers' preferences.

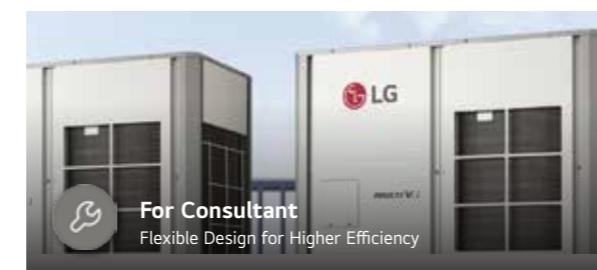

Applicable Free Combination

2 Units : 28-36 HP
3 Units : 50-56 HP
4 Units : 70-76 HP

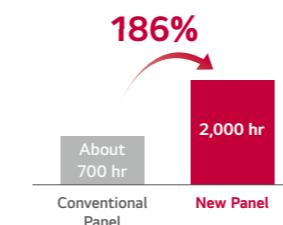

For Customer
Faster Delivery & Installation

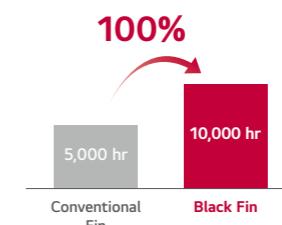

For Consultant
Flexible Design for Higher Efficiency

* The UXC chassis models are not applicable to free combination.
* The 26 HP model of UXC chassis cannot be combined with other models.
* More information can be checked in the LATS tool.

Fog¹⁾
(35°C, 24hr)
* Verification of corrosion resistance performance
- Test Method B of ISO21207
- ASTM B117 / (2,000 hours) (Last updated : Jul. 2022)

* The product is not fully anticorrosive. To install near the sea, additional measures can be required.

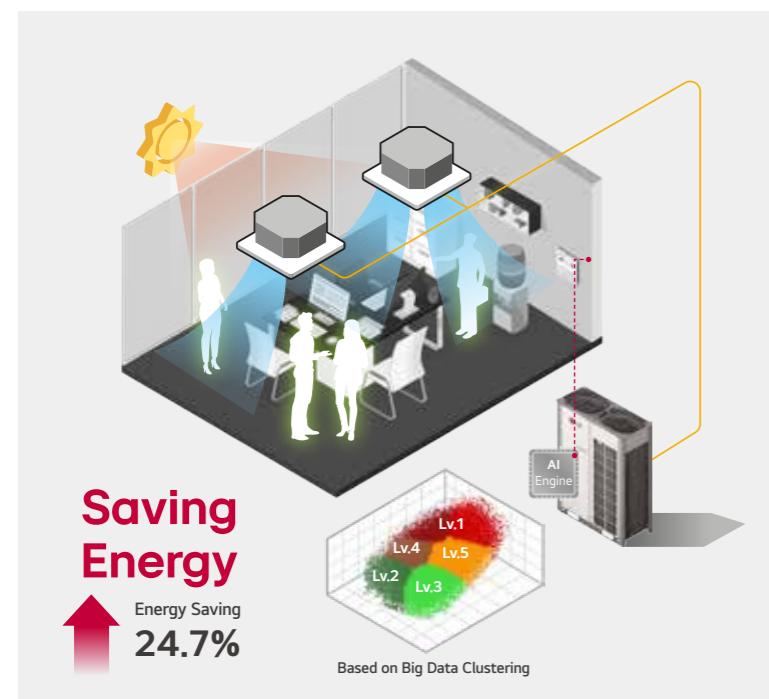

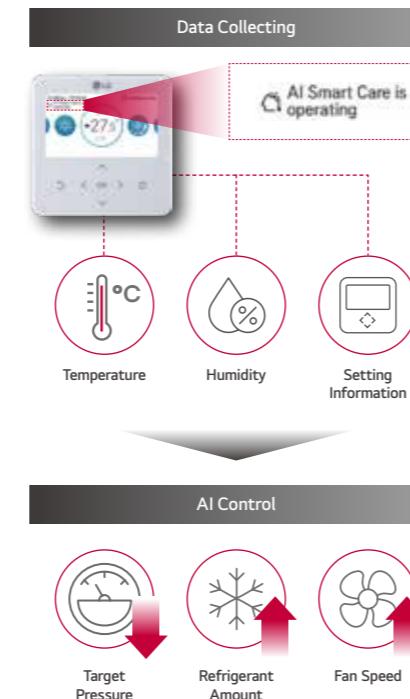

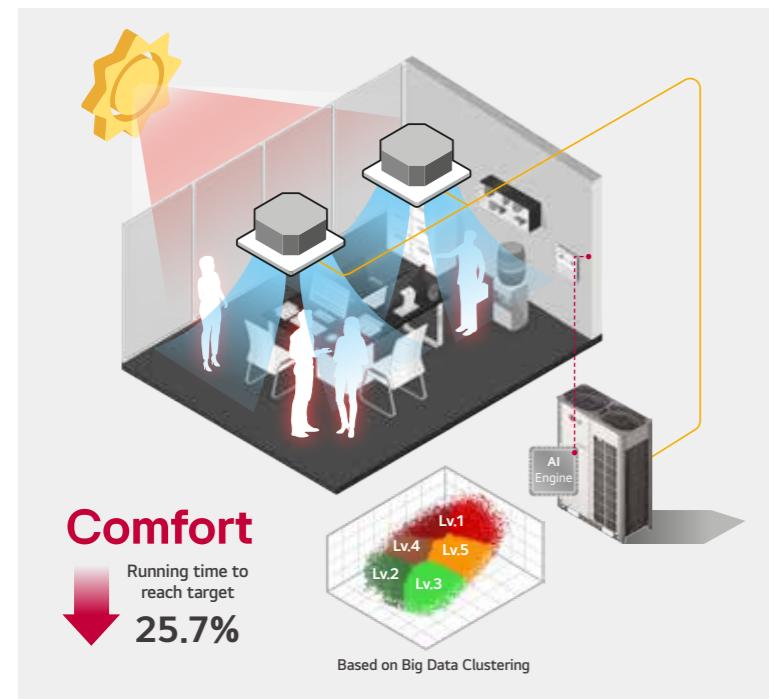

Fog¹⁾
(35°C, 24hr)
* Verification of corrosion resistance performance
- Test Method B of ISO21207
- ASTM B117 / ISO 9227 (5,000 hours → 10,000 hrs.) (Last updated : Dec. 2020)

Test process is conducted according to
ASTM B117
1) Salty water concentration :
NaCl aqueous solution (5%)

Test process is conducted according to
ASTM B117
1) Salty water concentration :

AI Smart Care

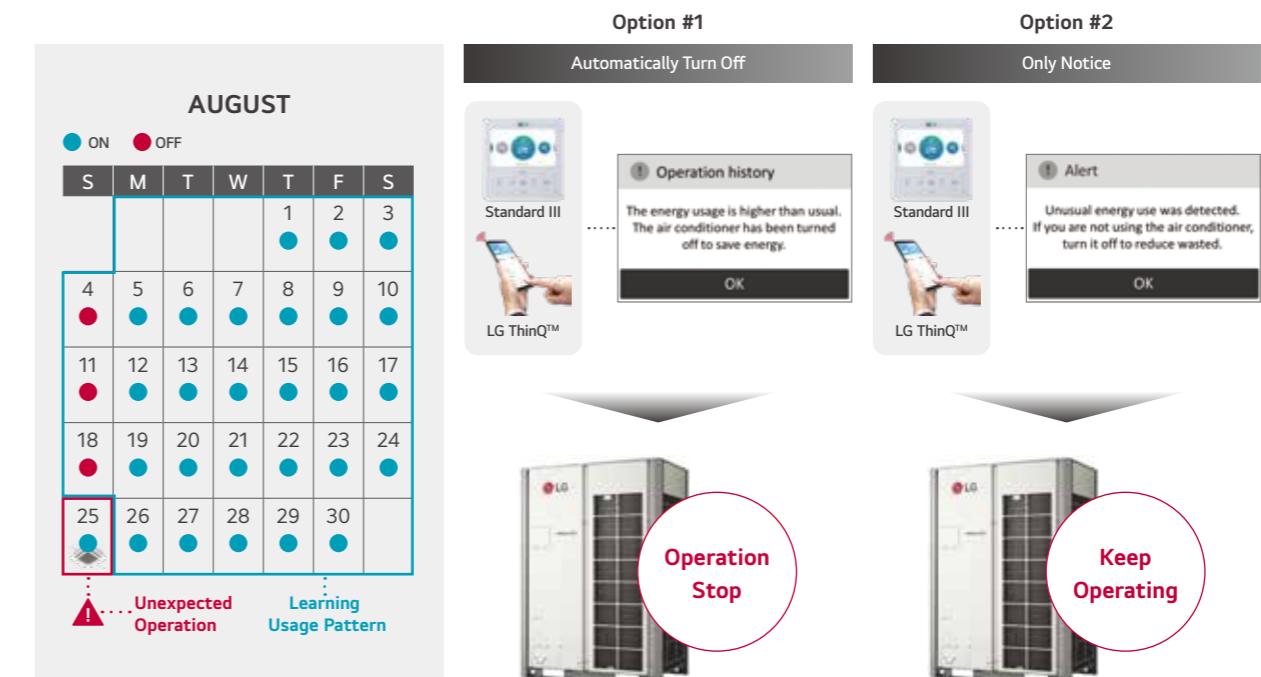

It autonomously implements solutions by adjusting the running time to reach target as well as taking into consideration the best efficiency point to operate in order to save energy.

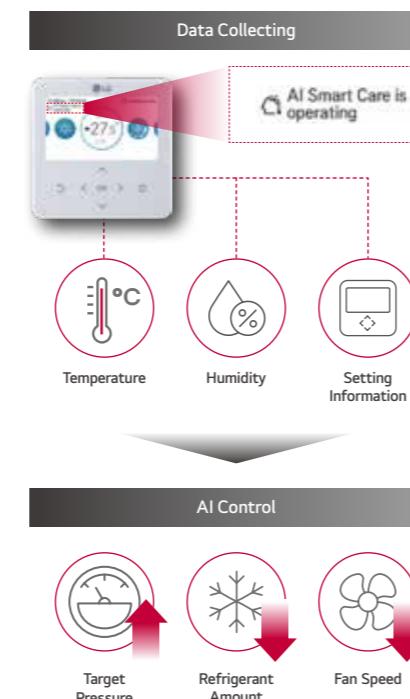

※ The feature above is to help customers understand, and detailed logic may vary depending on the actual environment.
※ This is the internal test that is followed KS Standard (Model : 24 HP of MULTI V / Test condition : KS B ISO 15042 : 2006)
※ The value of energy saving is the result of comparison AI Smart Care and normal operation.

AI Energy Waste Alert

MULTI V *i* learns usage patterns and prevents energy waste by judging abnormal operation when it is not normally operated. It can be saved energy by displaying a notification or automatically stopping operation.

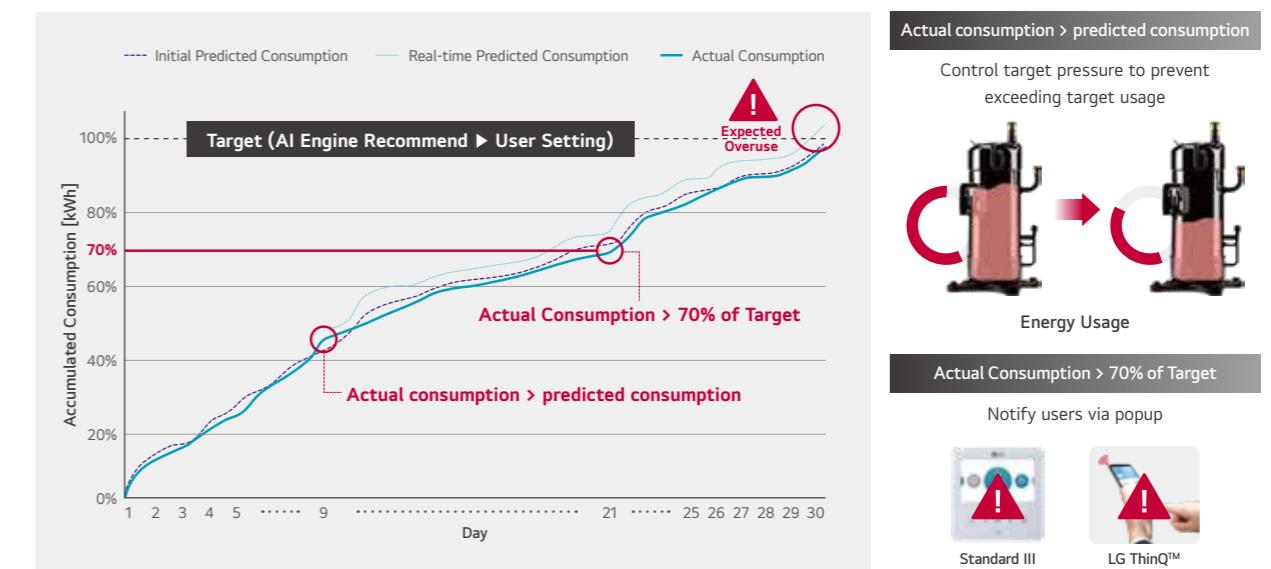

※ To use this function, at least 2 weeks of usage pattern learning period is required.
※ The waste alert will be displayed at least 2 hours after the indoor unit is turned on.

AI Energy Management

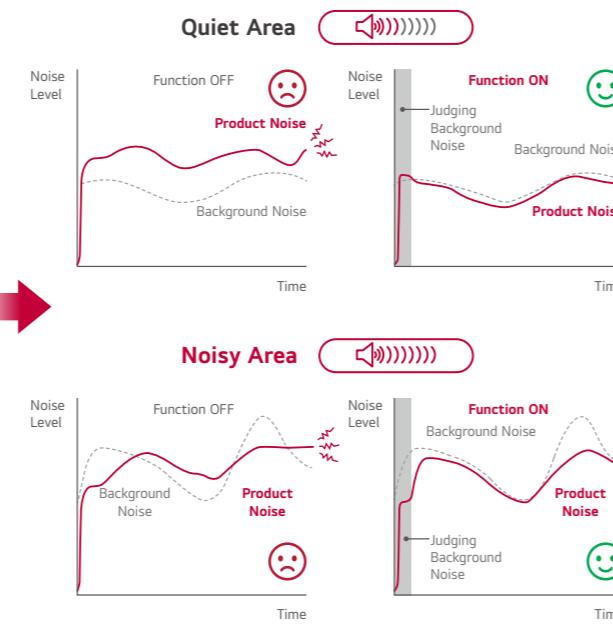

MULTI V *i* is able to preset monthly energy usage and consume power according to the target that has been previously set. By comparing and analyzing previous power consumption of the current month and planned daily energy usage, overuse of the HVAC system operational costs can be prevented by AI Energy management.

※ The above image is a graph for better understanding. Results may vary depending on the environment.
※ If more accurate status for energy consumption is needed, ACP and PDI have to be installed.
※ To alarm for exceeding 70% of target consumption, the user should activate the Alarm Popup Setting function on the Wired Remote Controller (Purchase Separately) in advance.
※ To use the above function, users should input the monthly target consumption on the wired remote controller (For the usage period of less than 1 year, the recommended target consumption is displayed, and for the usage periods of more than 1 year, the previous year's consumption is displayed).

Noise Adaptive Control

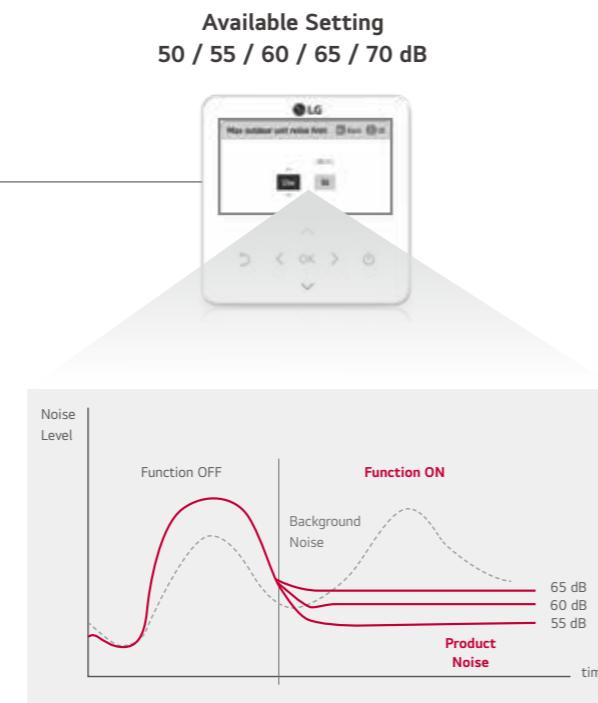

MULTI V *i* calculates the appropriate noise by considering the background noise and the user's location and operates with the limited noise. And the product noise does not exceed the background noise, users will not be disturbed by the product noise.

- ※ AI Engine calculates the target noise considering background noise and distance between the product and the user (Sound pressure).
- ※ To use the above function, the installer should input the installation distance between the product and the user.
- ※ After powering on the outdoor unit, the AI engine needs 10 minutes to measure and judge the background noise.
- ※ The operation may differ according to the environment, and noise reduction may impact the performance.

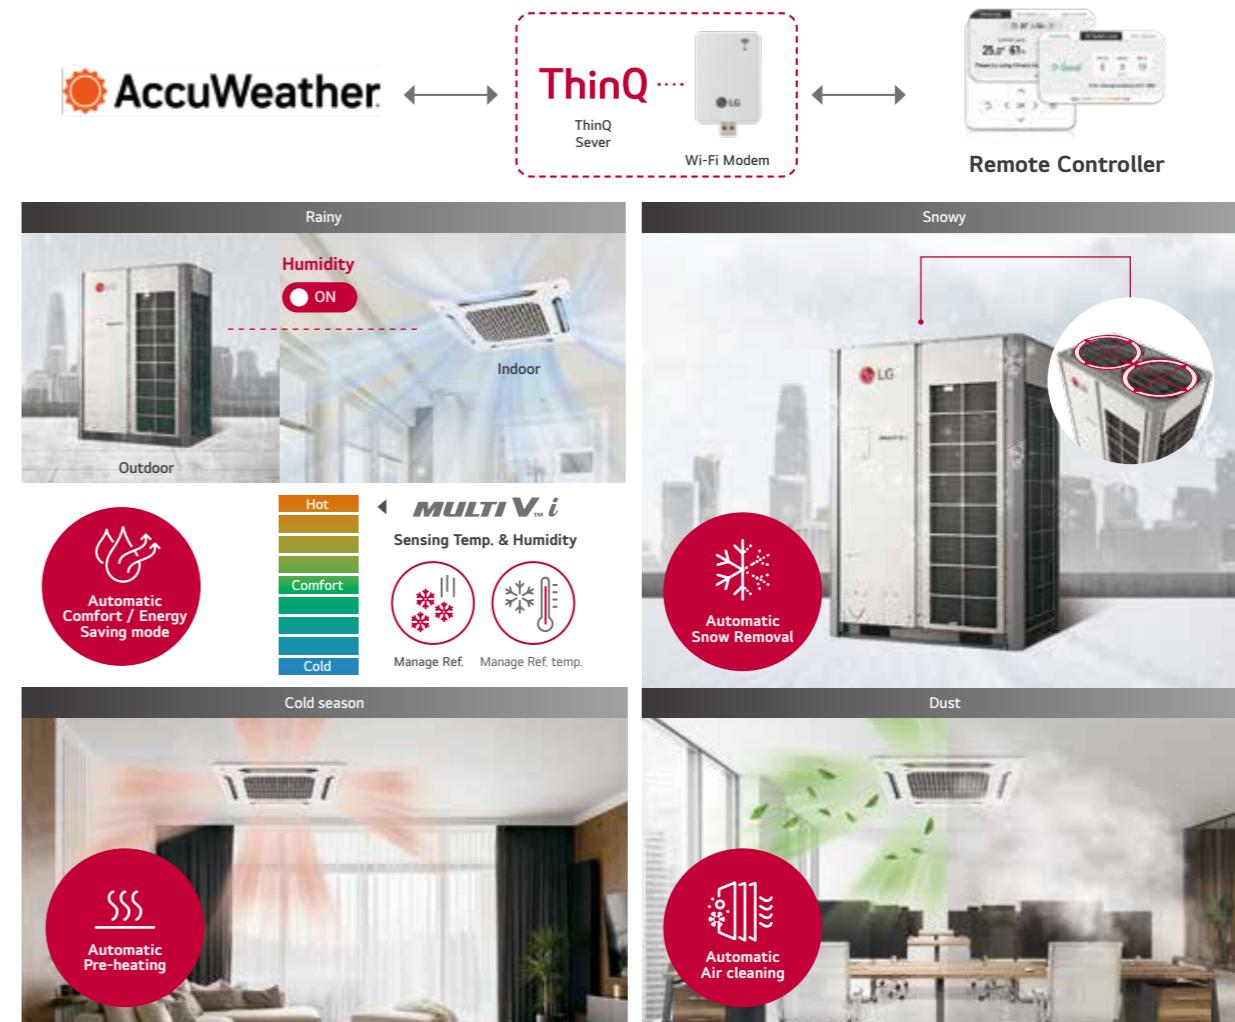

Noise Target Control

The outdoor unit's noise can be restricted by the set sound level in advance, allowing customers to enjoy comfortable conditions while avoiding disturbing their neighbors and complying with the local noise regulations.

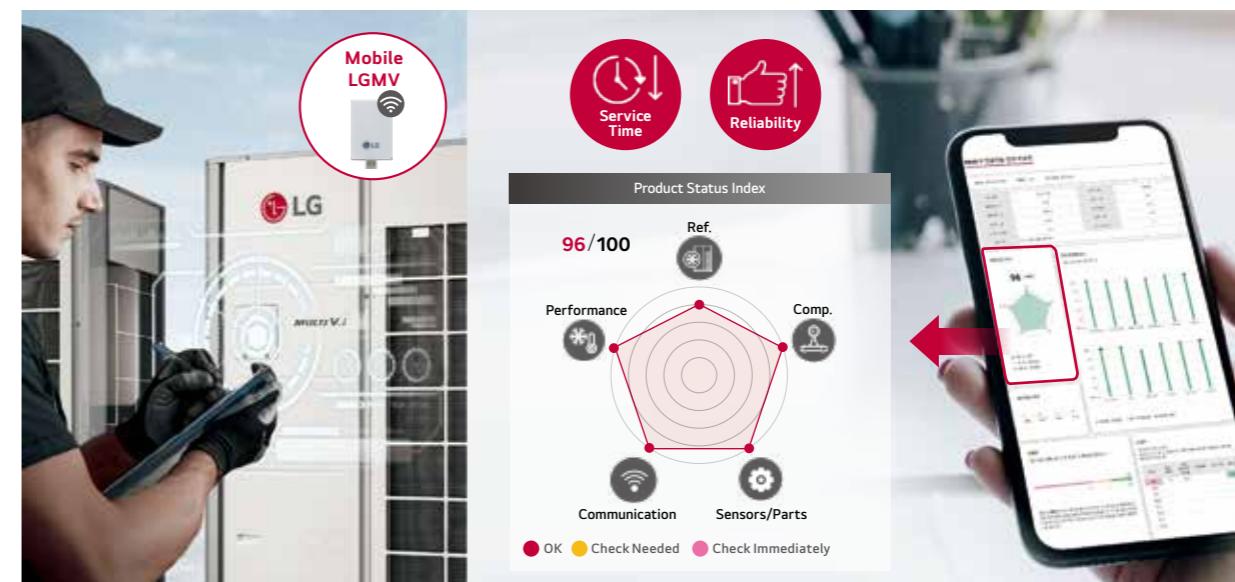

Weather Information Interlocking Control

This feature allows MULTI V *i* to provide environmentally optimized performance such as preheating, snow removal, air cleaning display and comfortable power saving mode display according to the weather information (live and forecast) received from AccuWeather.

AI Smart Diagnosis

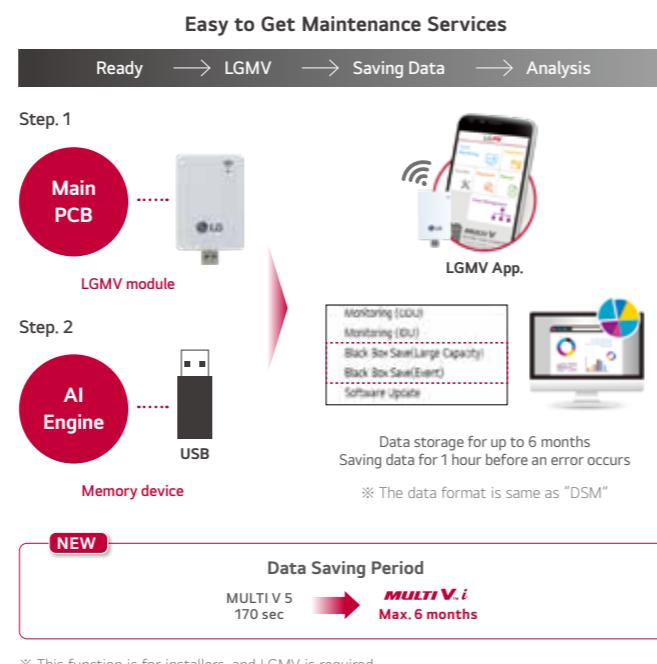

AI Smart Diagnosis saves service time and provides for reliable LG MULTI V *i* operation by automatically analyzing and visualizing the product's performance status.

※ UI may be changed without notification.

Large Capacity Black Box

Quick Service can be done because the large-capacity black box in the AI engine stores up to Max 6 months of operation data and 100 failure-events information.

Auto Tuning System

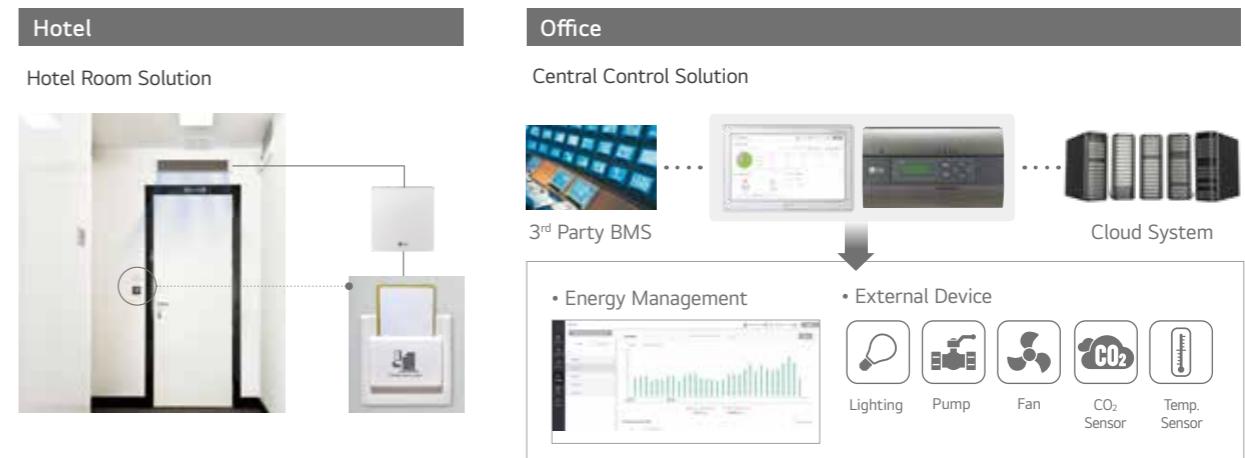

LG MULTI V i provides a new experience to customers with faster and easier installation and service.

※ This function is to be applied to compressor and fan motor.

LG's Control Solution

LG MULTI V i offers a diverse range of effective control solutions that satisfy the specific needs of each building and its user scene.

Apartment

Power Distribution Solution

Residential

Smart Individual Control Solution

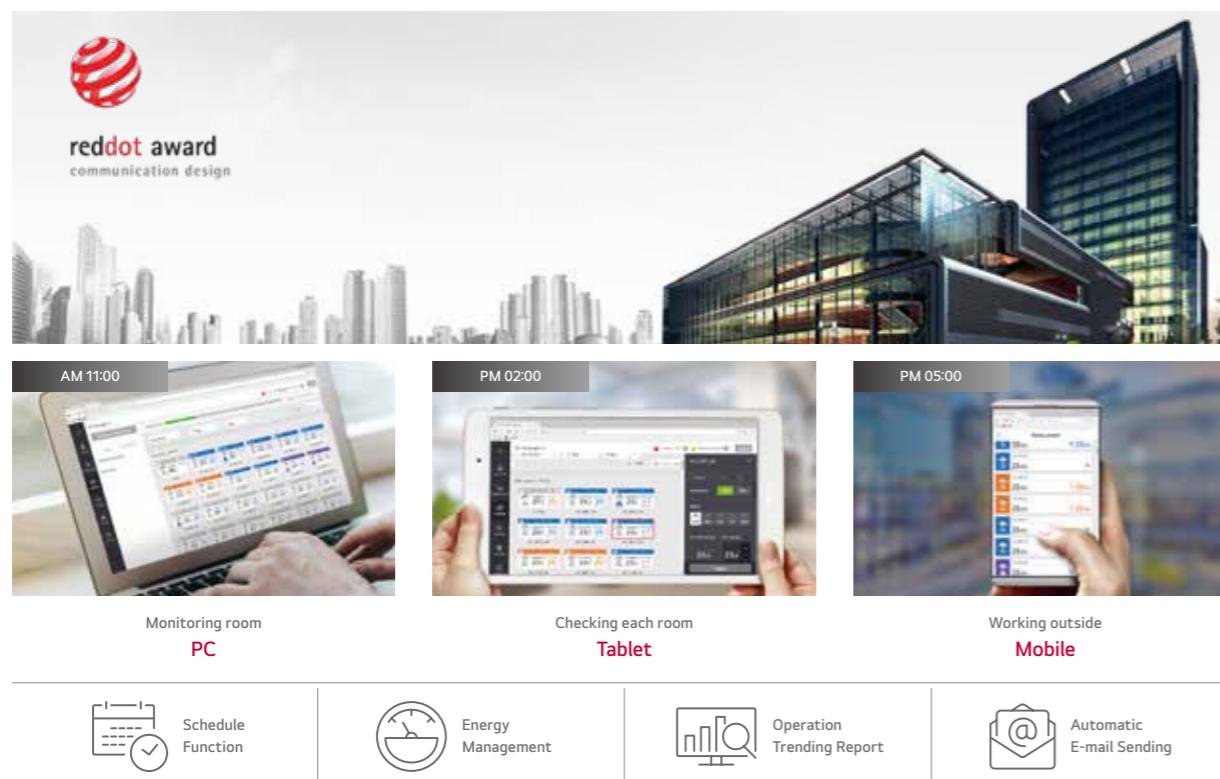

Small Building

Small Central Control Solution

Smart GUI

Smart GUI allows remote management via various devices such as PC, tablet and smart phone.

New Innovative Controller

LG Deluxe remote controller provides better customer experiences. (It's easy to use, with E-saving and simple maintenance.)

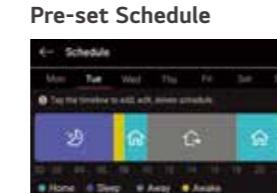

Features

- Installation wizard
- Built-in Wi-Fi with ThinQ Capability
- Humidity / Proximity sensor
- Seven (7) Day Scheduling with Mode
 - Home / Away / Sleep / Awake
- Function Code search Tool

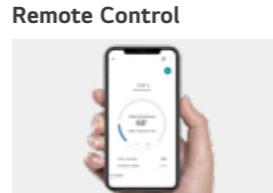

Full Touch & Easy Access

LG Deluxe has full touch LCD screen & slim design suitable for the residential application. In addition, user-oriented UX design enhances user convenience.

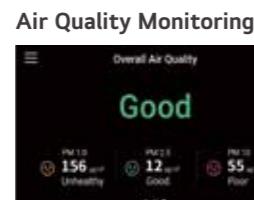

Pre-set Schedule

Seven Day scheduling with Home/Away/Sleep/Awake mode makes configuration much easier. And seasonal program setting offers more flexibility.

Remote Control

The built-in Wi-Fi module makes the connection to ThinQ cloud simple and easy. Seven day schedule is synchronized between ThinQ cloud and wired remote controller.

Air Quality Monitoring

LG Deluxe can display air quality status when the air purifying device is installed. It also shows air quality monitoring history by day, week, month and year.

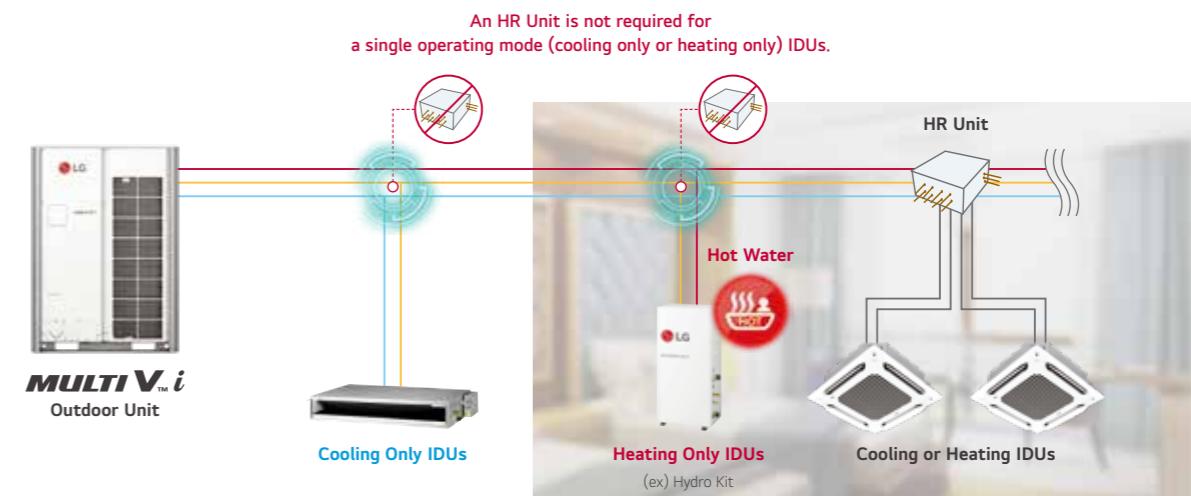

Energy Navigation

The Energy Navigation provides system operation trend per day. Running time and power consumption is also provided compared to last year by week, month and year.

Simpler Installation by Free HR Unit Function

When an indoor unit is used solely for cooling or heating, it can be connected to the simultaneous system without the need to connect to the HR unit, allowing it to operate seamlessly.

Features

Applicable in sites where cooling, heating and hot water are simultaneously needed

(ex. hotel, hospital, etc.)

Save time and money with the Free HR Unit Function

(Cost reduction through fewer HR units, piping installations and reduced labor)

※ This function will be available within 1H-'25 (This function application schedule may be changed without notification).

Position of Sound Pressure Level Measuring

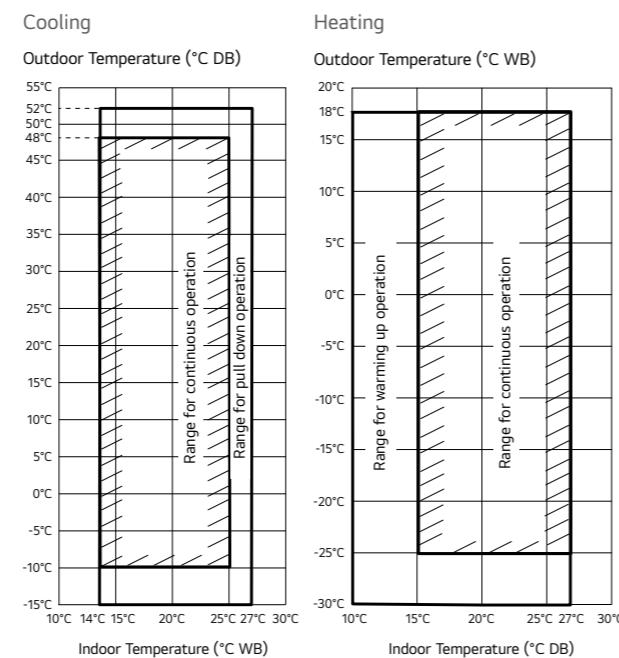

- Data is valid at diffuse field condition.
- Data is valid at nominal operating condition.
- Reference acoustic pressure 0dB = 20μPa.
- Sound pressure level is measured on the rated condition in the anechoic rooms by ISO 3745 standard. Refer to the model specifications for nominal conditions (Power source and Ambient temperature, etc).
- Sound levels can be increased in accordance with installation and operating conditions. (Operating conditions include some functional condition like Static pressure mode, air guide use, Room target temperature setting, etc and these functions are different in accordance with each model).
- Sound level will vary depending on a range of factors such as the construction (acoustic absorption coefficient) of particular room in which the equipment is installed.

Cooling / Heating Operation

Note
1. These figures assume the following operating conditions
: Equivalent piping length is standard condition, and level differenc is 0m.
2. Range of pull down operation: If the relative humidity is too high, cooling capacity can be decreased by the sensible heat reduction.
3. Warming up operation means that the outdoor (outside) unit operates to reach the range of continuous operating, however it may not operate continuously due to safety or protection logic.

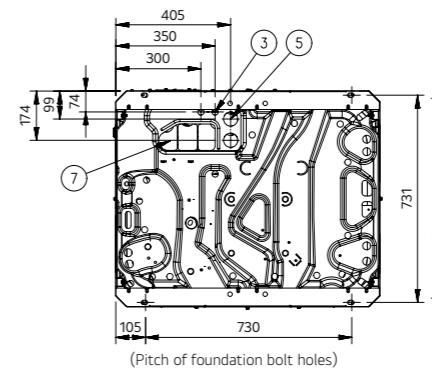

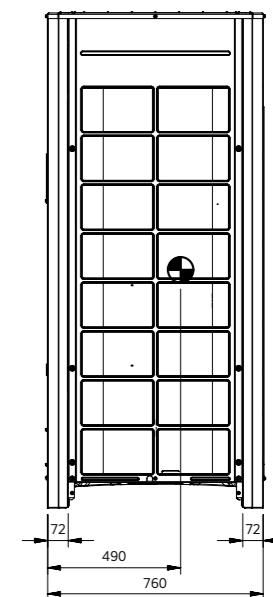

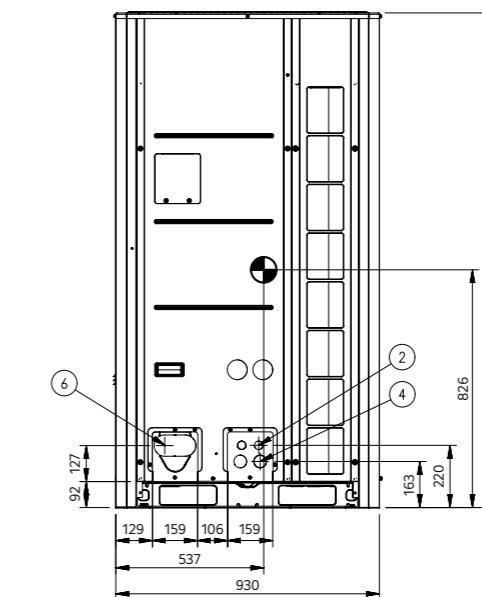

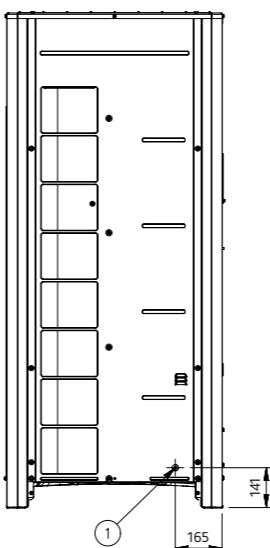

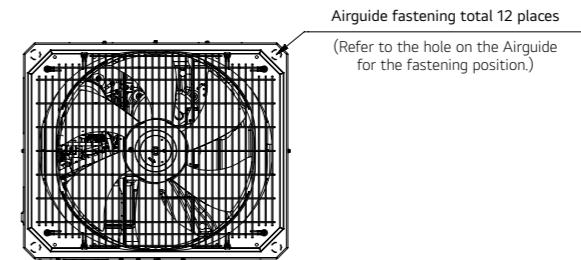

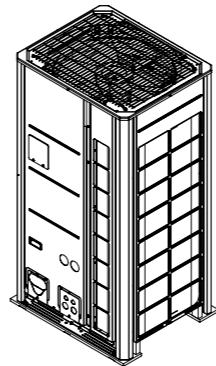

Simultaneous Cooling / Heating Operation

Note
1. These figures assume the following operating conditions
: Equivalent piping length is standard condition, and level differenc is 0m.
2. Range of pull down operation: If the relative humidity is too high, cooling capacity can be decreased by the sensible heat reduction.
3. Warming up operation means that the outdoor (outside) unit operates to reach the range of continuous operating, however it may not operate continuously due to safety or protection logic.

1. Eurovent Test Condition : For more info regarding program consult www.eurovent-certification.com

2. Capacities are based on the following conditions :

- Cooling : Indoor 27°C (80.6°F) DB / 19°C (66.2°F) WB Outdoor 35°C (95°F) DB / 24°C (75.2°F) WB
- Heating : Indoor 20°C (68°F) DB / 15°C (59°F) WB Outdoor 7°C (44.6°F) DB / 6°C (42.8°F) WB
- Piping Length : Interconnected Pipe Length = 7.5m
- Elevation Difference (Outdoor ~ Indoor Unit) is 0m.

3. Wiring cable size must comply with the applicable local and national code.

4. Sound pressure level is measured on the rated condition in the anechoic rooms by ISO 3745 standard.

Refer to the model specifications for nominal conditions. (Power source and Ambient temperature, etc.) Sound levels can be increased in accordance with installation and operating conditions. (Operating conditions include some functional condition like Static Pressure mode, air guide use, Room target temperature setting, etc and these functions are different in accordance with each model).

Sound level will vary depending on a range of factors such as the construction (acoustic absorption coefficient) of particular room in which the equipment is installed.

5. Explanation of Terms

- EER : Energy Efficiency Ratio (Cooling)
- SEER : Seasonal Energy Efficiency Ratio (Refer to Typical Cooling Season)
- COP : Coefficient Of Performance (Heating)
- SCOP : Seasonal Coefficient Of Performance (Refer to Typical Heating Season)

6. Due to our policy of innovation some specifications may be changed without notification.

7. This product contains Fluorinated greenhouse gas. (R410A, GWP (Global warming potential) = 2,087.5)

1) Maximum numbers are prepared based on assumption that all 2.2kW indoor units are connected. The numbers in parentheses means maximum connectable indoor units in accordance with outdoor units combination (160% - 200%). The recommended ratio is 130%.

Highlight of the R32 Refrigerant

Low GWP

- More eco-friendly refrigerant compliant with regulation

Single Component

- Easy to handle, reuse and recycle
- Affordable and readily available

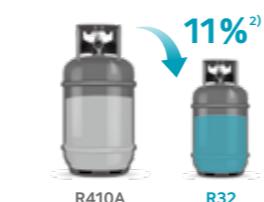

High Volumetric Energy

- Lower compressor displacement

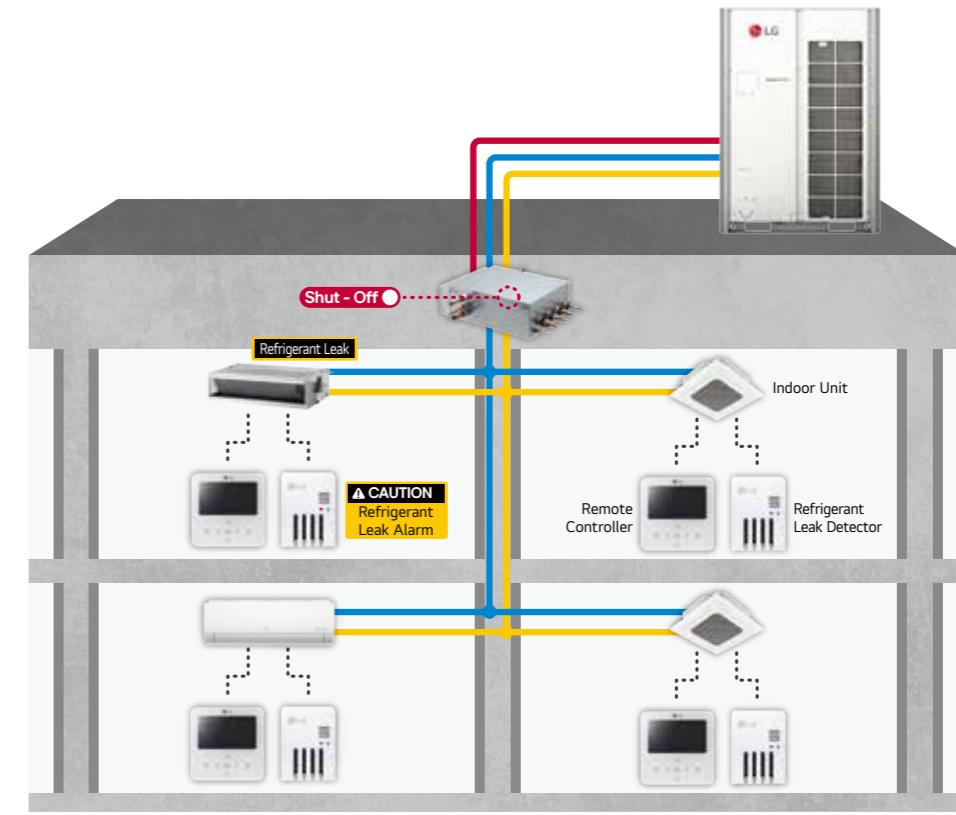

Less Refrigerant Charge

- Savings on cost of injecting & replacing refrigerant
- Savings on purchase of refrigerant

Safety Device Response Scenarios

When a refrigerant leak occurs in the indoor unit or in the piping between the Heat Recovery (HR) Unit and the indoor unit, the system operates as follows: All indoor units will stop operating even if only one indoor unit has a leak. Alternatively, the shut-off valve of the leaking indoor unit will close, and the leaking unit will stop while other indoor units continue to operate. This integration is designed to enhance safety by quickly identifying leaks and preventing the spread of refrigerants to ensure compliance with refrigerant regulations.

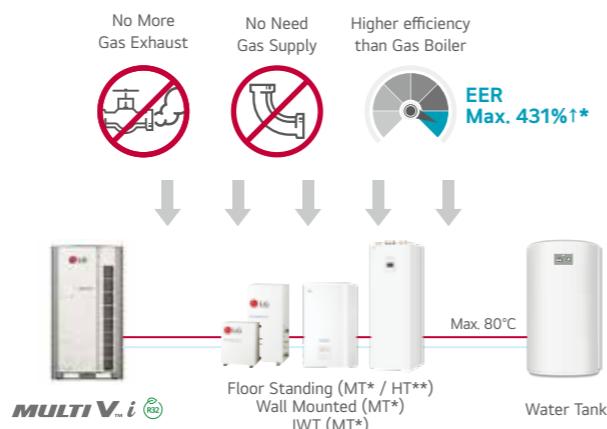

Less Charge, Less Carbon Emission System

MULTI V i R32 can save Max. 14% of refrigerant amount compared to R410A system, which leads to reduced carbon dioxide emissions.

More Efficient Hot Water Supply Solution

MULTI V i with Hydro kit provides floor heating and hot water supply without using gas. It is a more environmentally friendly system with higher energy efficiency and lower carbon emissions.

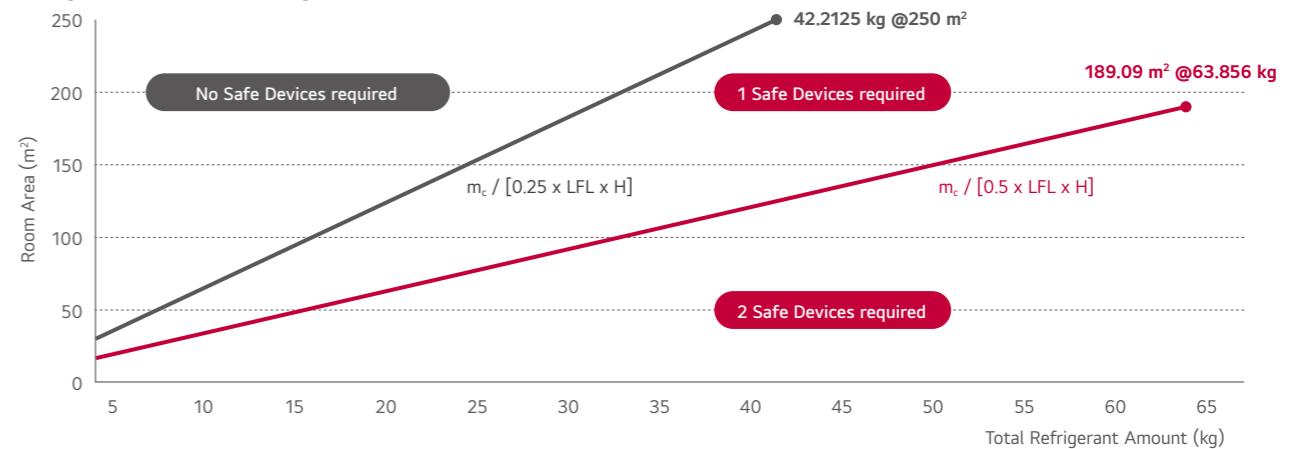

* The information is based on Product Data Book.
(R410A system model: ARU****LTE6, R32 system model: ZRUM***LTE6)
** Results may vary depending on the environment.

R32 Indoor Unit Design Guide

A HVAC system using R32 refrigerant requires the minimum room area because of its flammability and it should be designed by LATS HVAC.

Ceiling Mounted (Installation Height : 2.2 m)

* One safety device: Refrigerant leak detector with alarming function
** Two or more device: Refrigerant leak detector + ventilator or Refrigerant leak detector + shut-off valve
